

BUSINESS DATA MANAGEMENT

CAPSTONE PROJECT

Project On:

**Improving Revenue Stability & Member Retention at
Muscle & Fitness 2 Gym using Data Analysis**

Presented by: **Barun Sharma (23f2005609)**

PROJECT OVERVIEW

MUSCLE & FITNESS 2

About the Business

Muscle & Fitness 2 is a local gym in Dhaleswar, Agartala serving the community for over 6 years.

- Offers monthly, quarterly, and yearly memberships
- Provides personal training services

Current Operations

- Two trainers (morning & evening shifts)
- Serves students, professionals, and residents
- Managed manually by the owner

PROBLEM STATEMENT

INEFFICIENT MEMBERSHIP TRACKING

Manual record-keeping limits visibility of **membership expiry** and **payment status**, making it difficult to track renewals and active members.

HIGH MEMBER CHURN & REVENUE INSTABILITY

A large number of members do not renew on time, leading to high **churn risk** and **unstable revenue**.

DATA & ANALYTICAL APPROACH

DATA COLLECTION

- **Primary data** collected from gym's **manual registers**
- Includes **member details, payments, and plan types**
- Covers period: **March 2025 - August 2025**
- Data digitized and structured in **Excel**

DATA PREPARATION & ANALYSIS

- Cleaned data by **removing duplicates** and **standardizing date formats**
- Developed **membership lifecycle classification** (Active / At Risk / Churn Risk)
- Analyzed **monthly revenue and profit** trends to assess financial performance
- Applied **RFM analysis** to segment customers based on **behavior**
- Built an interactive **Excel dashboard** using **Pivot Tables** and **Charts** for decision-making

METHODOLOGY

MEMBERSHIP LIFECYCLE ANALYSIS

- **Analysis Date:** 31 August 2025
- Members were classified based on membership expiry date
- **Active:** Membership valid beyond analysis date
- **At Risk:** Membership nearing expiry
- **Churn Risk:** Membership already expired

RFM CUSTOMER SEGMENTATION

RFM metrics used:

- **Recency:** Days since last payment
- **Frequency:** Number of payment transactions
- **Monetary:** Total payment contribution
- RFM scores assigned on a **1–5** scale

Customers segmented into:

- **Champion**
- **Loyal**
- **At Risk**
- **Churn Risk**

DASHBOARD & KEY FINDINGS

Monthly Revenue Trend (Mar–Aug 2025)

Monthly Profit Trend (₹)

Distribution of Members by Membership Status

Customer Segmentation Based on RFM Analysis

KEY FINDINGS

- **Revenue** fluctuated significantly across months
- **63%** of members were classified as **churn risk**
- **Profitability** remained highly dependent on **active memberships**
- **RFM analysis** revealed a relatively **small loyal** customer base

RECOMMENDATIONS & BUSINESS IMPACT

RECOMMENDATIONS

- ✓ Implement a structured **digital membership tracking system**
- ✓ Monitor **expiry dates** and send **renewal reminders**
- ✓ Focus on retaining **churn-risk** and **at-risk** members
- ✓ Use **dashboard** monitoring for monthly business decisions
- ✓ Promote **personal training** services to improve revenue per member

EXPECTED BUSINESS IMPACT

- 📈 Improved **revenue stability** through better retention
- 📉 Reduction in **membership churn** and **missed renewals**
- 💰 Higher profitability through consistent **active** memberships
- 📊 Better decision-making using **data-driven insights**
- 🚀 Improved **operational efficiency** and business growth

CONCLUSION

- The project successfully transformed **manual gym records** into a **structured data-driven management system**
- **Revenue, profitability, membership retention**, and **customer behaviour** were analyzed using **Excel**-based analytical methods
- The analysis identified **high churn risk** and **unstable revenue** patterns as major business concerns
- **RFM segmentation** and **dashboard** analysis provided actionable insights for improving retention and business performance
- The proposed recommendations can help the gym improve operational efficiency, revenue stability, and long-term growth

FOR YOUR TIME AND ATTENTION.
